Our theme today is **"Social Entrepreneurship as a Core to Building Sustainable Enterprises in Uganda"**. 14,000 registered NGOs, and 1 million SMEs in Uganda grapple with building sustainable organisations. Today's discussion is part of the solution this challenge. How can we be problem solvers using local resources? How can we be independent as we design our own community solutions? How can we make independent decisions and create decent employment for the bulging youth population? All these are questions and more that give us sleepless nights.

Capital solutions Ltd, a social enterprise based in Uganda, created the Social Entrepreneurship Forum which is an indigenous membership forum that has a membership of over 250 social enterprises in various sectors to network, access finance, access markets and inspire each other. The businesses are largely micro and small social enterprises who are innovatively solving community challenges in low income communities within Uganda. These Social enterprises have played a significant role in socio-economic growth and development of Uganda through creating employment especially to the vulnerable populations i.e. the Youth and women.

The 2022 Symposium will present everyone with an opportunity to come together and explore the endless possibilities of doing business for the greater good & enables us to work towards overcoming the social challenges in our communities. Over 300 participants have joined in to celebrate and give a deep dive into social entrepreneurship as a business model.

We are targeting social entrepreneurs, investors, Philanthropists, NGOs, Government, development partners, students, researchers, social impact investors, change makers, business owners and those with a vision that includes social impact. The Symposium is held today as a hybrid event embracing digital platforms and we shall run it live on YouTube.

I would like to thank you all for joining this very interesting discussion today and looking forward what's ahead of us. I wish you all an enjoyable and productive symposium.
